About the Model Developer Crosswalks

The purpose of this document is to help awardees of the Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program identify how existing data collection requirements for each model align with the federal performance measurement requirements and to assess whether adaptations and/or additions to current data collection efforts are needed for reporting the new performance measures. The crosswalk tables identify whether related measures are recommended or required for data collection by model and how those measures are captured in data collection for the model. This will allow awardees to compare model data collection with information about the federal performance measure requirements to identify areas of alignment.

About DOHVE

The purpose of the Design Options for Home Visiting Evaluation (DOHVE) contract is to provide research and evaluation support to the MIECHV program.

This document was prepared for the U.S. Department of Health and Human Services (HHS), HRSA, and ACF by James Bell Associates, Inc., under ACF contract number HHSP233201500133I.

For additional DOHVE resources, please visit <http://www.jbassoc.com/reports-publications/dohve>

Contact Information

For more information please contact the ACF Federal Project Officer or a member of the DOHVE team.

EARLY HEAD START-HOME VISITING

Performance Measures	Numerator Denominator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
BENCHMARK 1: Maternal and Newborn Health							
1. Preterm birth	Number of live births (index child or subsequent children among mothers who enrolled in home visiting prenatally before 37 weeks) born before 37 completed weeks of gestation and after enrollment	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Pregnant women enrolled prior to 37 completed weeks of gestation and who delivered in the reporting period. Data Collection Time Point: End of pregnancy. Suggested Data Elements: Date of enrollment, gestational age at enrollment (or estimated delivery date to calculate gestational age at enrollment), child date of birth, live birth status (yes/no).
(Numerator)							
	Number of live births after enrollment who were born to mothers enrolled in home visiting prenatally before 37 weeks						
(Denominator)							
2. Breastfeeding	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Infants who reached 6 to 12 months of age within the reporting period whose mothers enrolled prenatally. Data Collection Time Point: Home visit at or after the child reached 6 months. Suggested Data Elements: Date of enrollment, child date of birth, breastfed any amount at 6 months, date assessed.
(Numerator)							
	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) enrolled in home visiting for at least 6 months						
(Denominator)							
3. Depression Screening	For those not enrolled prenatally, number of primary caregivers enrolled in home visiting who are screened for depression within the first 3 months since enrollment; for those enrolled prenatally, the number of primary caregivers screened for depression within 3 months of delivery	Recommended	Screener: EHS does not endorse a specific screening tool, but programs commonly use the Edinburgh Postnatal Depression Scale (EPDS)	Determined by LIA	All enrolled pregnant women and caregivers	Determined by LIA	Target Population: Primary caregivers with at least 3 months enrollment. Data Collection Time Point: At least 3 months after enrollment for those enrolled postnatally and at least 3 months post-delivery for those enrolled prenatally. Suggested Data Elements: Date of enrollment, child date of birth, caregiver depression screening, date
(Numerator)							

EARLY HEAD START-HOME VISITING

Performance Measures	Numerator Denominator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	For those not enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least 3 months; for those enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least three months post delivery (Denominator)						of screening, enrolled prenatally.
4. Well-child visit	Number of children (index child) enrolled in home visiting who received the last recommended well child visit based on the AAP schedule (Numerator)	Required	Determined by LIA	Determined by LIA	All enrolled children	Determined by LIA	Target Population: Enrolled index children. Data Collection Time Point: Data will be collected at multiple points in time throughout enrollment to correspond to the AAP recommendation schedule. Suggested Data Elements: Date of home visit, completion of last expected well-child visit.
	Number of children (index child) enrolled in home visiting (Denominator)						
5. Postpartum care	Number of mothers enrolled in home visiting prenatally or within 30 days after delivery who received a postpartum visit with a healthcare provider within 8 weeks (56 days) of delivery (Numerator)	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Mothers enrolled prenatally or within 30 days of giving birth and remain enrolled for at least 8 weeks postpartum. Data Collection Time Point: At least 56 days post-delivery. Suggested Data Elements: Mother enrolled prenatally, date of enrollment, postpartum health visit, postpartum health visit date, length of enrollment, child date of birth.
	Number of mothers who enrolled in home visiting prenatally or within 30 days after delivery and remained enrolled for at least 8 weeks (56 days) after delivery (Denominator)						
6. Tobacco cessation referrals	Number of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were referred to tobacco cessation counseling or services within 3 months of enrollment (Numerator)	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers enrolled for 3 months who used tobacco or cigarettes at enrollment. Data Collection Time Point: Intake and 3 months post-enrollment. Suggested Data Elements: Date of enrollment, tobacco use at enrollment, tobacco cessation referral, date of tobacco cessation referral.
	Number of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were enrolled for at least 3 months (Denominator)						

EARLY HEAD START-HOME VISITING

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
BENCHMARK 2: Child Injuries, Abuse, Neglect, and Maltreatment, and Emergency Department Visits							
7. Safe sleep	Number of infants (index child aged less than 1 year) enrolled in home visiting whose primary caregiver reports that they are always placed to sleep on their backs, without bed-sharing or soft bedding	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Index children less than 1 year of age during the reporting period. Data Collection Time Point: Within 1 year of date of birth. Suggested Data Elements: Child date of birth, safe sleep practices.
(Numerator)							
(Denominator)	Number of infants (index child) enrolled in home visiting who were aged less than 1 year during the reporting period						
8. Child injury	Number of parent-reported nonfatal injury-related visits to the ED since enrollment among children (index child) enrolled in home visiting	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Emergency department visit, emergency department visit date.
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting						
9. Child maltreatment	Number of children (index child) enrolled in home visiting with at least 1 investigated case of maltreatment since enrollment	Required	Program Information Report	Program Information Report: Number of families receiving services for child abuse and neglect or maltreatment	All enrolled children	Determined by LIA	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Investigated child maltreatment, date of investigated child maltreatment.
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting						
BENCHMARK 3: School Readiness and Achievement							
10. Caregiver-child interaction	Number of primary caregivers enrolled in home visiting who receive an observation of caregiver-child interaction by the home visitor using a validated tool	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with index child in target age range (target age range determined by grantee and consistent with administration protocol specified by validated tool selected).
(Numerator)							

EARLY HEAD START-HOME VISITING

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Number of primary caregivers enrolled in home visiting with children reaching the target age range						Data Collection Time Point: Based on the child’s age during the reporting period. Suggested Data Elements: Parent-child interaction observation, parent-child interaction observation date.
(Denominator)							
11. Early language and literacy	Number of children (index child) enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories, and/or sang songs with their child daily, every day	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Caregiver or family member support of early language and literacy activities, date of caregiver or family member support of early language and literacy activities.
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting						
12. Developmental screening	Number of children (index child) enrolled in home visiting with at least one screening within the AAP-defined age groups during the reporting period	Required	Screener: EHS does not endorse a specific screening tool; EHS requires that the assessment cover developmental, sensory, and behavioral domains; the use of standardized and culturally-sensitive tools are encouraged as available	EHS does not require the use of specific data forms or data systems Program Information Report: Screening results, and a means to determine whether further evaluation is needed	All enrolled children	Within 45 calendar days of enrollment; ongoing as part of regularly scheduled Early and Periodic Screening, Diagnostic, and Treatment (EPDST) visits and health and developmental screenings	Target Population: Primary caregivers with index children ages 9 months to 30 months. Data Collection Time Point: Throughout reporting period for children ages 9 months to 30 months. Suggested Data Elements: Date of developmental screening, index child age (eligibility for assessment).
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting reaching the specified time frame during the reporting period						

EARLY HEAD START-HOME VISITING

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
13. Behavioral concerns (Numerator)	Number of home visits where primary caregivers enrolled in home visiting were asked if they have any concerns regarding their child’s development, behavior, or learning	Required	Determined by LIA	Determined by LIA	Determined by LIA	Determined by LIA	Target Population: Postnatal primary caregivers with index children. Data Collection Time Point: Each home visit throughout the reporting period. Suggested Data Elements: Developmental concerns inquiry, home visit date, primary caregiver’s pre- or postnatal status.
(Denominator)	Total number of home visits during the reporting period						
BENCHMARK 4: Crime or Domestic Violence							
14. Intimate partner violence screening (Numerator)	Number of primary caregivers enrolled in home visiting who are screened for IPV using a validated tool within 6 months of enrollment	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers enrolled for at least 6 months. Data Collection Time Point: 6 months post-enrollment. Suggested Data Elements: IPV screening, IPV screening date, date of enrollment.
(Denominator)	Number of primary caregivers enrolled in home visiting for at least 6 months						
BENCHMARK 5: Family Economic Self-Sufficiency							
15. Primary caregiver education (Numerator)	Number of primary caregivers who enrolled in, maintained continuous enrollment in, or completed a high school degree or equivalent after enrollment in home visiting (and met the conditions specified in the denominator)	Required	Determined by LIA	Program Information Report: Completion of high school or GED requirements, and college degrees	All enrolled caregivers	At enrollment and as caregivers complete additional education, including college degrees	Target Population: Primary caregivers without a high school degree or equivalent at enrollment. Data Collection Time Point: Enrollment and end of each reporting period. Suggested Data Elements: High school degree or equivalent status at enrollment, enrollment or completion of high school degree or equivalent, enrollment of completion of high school degree or equivalent screening date.
(Denominator)	Number of primary caregivers without a high school degree or equivalent at enrollment						
16. Continuity of insurance coverage (Numerator)	Number of primary caregivers enrolled in home visiting who reported having health insurance coverage for at least 6 consecutive months since enrollment in home visiting	Required	Determined by LIA	Program Information Report: Number of caregivers and children with health insurance, type of insurance coverage for caregivers and children	All enrolled caregivers and children	At enrollment and the end of each program year	Target Population: Primary caregivers who have been enrolled in home visiting for 6 months. Data Collection Time Point: Measured on or after 6 months post-enrollment. Suggested Data Elements: Date of enrollment, continuous health insurance status for 6 months.

EARLY HEAD START-HOME VISITING

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
	Number of primary caregivers enrolled in home visiting for at least 6 months						
(Denominator)							
BENCHMARK 6: Coordination and Referral for Community Resources and Supports							
17. Completed depression referrals	Number of primary caregivers enrolled in home visiting who received recommended services for depression (and met the conditions specified in the denominator)	Required	Screener: EHS does not endorse a specific screening tool, but programs commonly use EPDS	Program Information Report: Number of depression referrals and services provided	All enrolled pregnant women and caregivers	Determined by LIA	Target Population: Primary caregivers who screened positive for depressive symptoms and were referred for services. Data Collection Time Point: After referral for positive depression screening. Suggested Data Elements: Prenatal status, child date of birth, date of enrollment, positive depression screening results, referral for depression services, depression services received date.
(Numerator)			Data source: Determined by LIA				
(Denominator)	Number of primary caregivers enrolled in home visiting who had a positive screen for depression within 3 months of enrollment (for those not enrolled prenatally) or within 3 months of delivery (for those enrolled prenatally) and were referred for services						

EARLY HEAD START-HOME VISITING

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
18. Completed developmental referrals	Number of children enrolled in home visiting who a) received individualized developmental support from a home visitor; b) were referred to early intervention services and received an evaluation within 45 days; OR c) were referred to other community services who received services within 30 days (and met the conditions specified in the denominator)	Required	Screener: EHS does not endorse a specific screening tool; EHS requires the assessment cover developmental, sensory, and behavioral domains; the use of standardized and culturally-sensitive tools are encouraged as available	Program Information Report: Number of children screened, number of children referred, number of children receiving follow-up services	All enrolled children	Determined by LIA	Target Population: Index children who screen positive for developmental delays. Data Collection Time Point: After positive developmental screening. Suggested Data Elements: Positive developmental screening, developmental delay services received, developmental delay service date.
(Numerator)			Data source: Determined by LIA				
(Denominator)	Number of children enrolled in home visiting with positive screens for developmental delays (measured using a validated tool)						
19. Intimate partner violence referrals	Number of primary caregivers enrolled in home visiting who received referral information to IPV resources (and met the conditions specified in the denominator)	Not required data collection by national model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers who screened positive for intimate partner violence (IPV). Data Collection Time Point: After positive IPV screening. Suggested Data Elements: Positive IPV screening results, IPV screening date, IPV referral, IPV referral date, date of enrollment.
(Numerator)							
(Denominator)	Number of primary caregivers enrolled in home visiting with positive screens for IPV (measured using a validated tool) within 6 months of enrollment						

Note from model: EHS has different data collection requirements at the local and national levels. Local EHS programs may have additional data collection requirements for some measures.

FAMILY SPIRIT

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
BENCHMARK 1: Maternal and Newborn Health							
1. Preterm birth	Number of live births (index child or subsequent children among mothers who enrolled in home visiting prenatally before 37 weeks) born before 37 completed weeks of gestation and after enrollment	Recommended	Medical Chart Review Form	Family Spirit does not require outcomes to be reported	All index children	Medical Chart Review Form is recommended after participant exits	Target Population: Pregnant women enrolled prior to 37 completed weeks of gestation and who delivered in the reporting period. Data Collection Time Point: End of pregnancy. Suggested Data Elements: Date of enrollment, gestational age at enrollment (or estimated delivery date to calculate gestational age at enrollment), child date of birth, live birth status (yes/no).
(Numerator)							
	Number of live births after enrollment who were born to mothers enrolled in home visiting prenatally before 37 weeks						
(Denominator)							
2. Breastfeeding	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	Recommended	Postpartum Form documents if baby is currently being breastfed, how many times a day, if the baby was ever breastfed, and how old the baby was when breastfeeding stopped.	Family Spirit does not require outcomes to be reported	All primary caregivers	Postpartum Form is recommended within 2 weeks postpartum; Demographics form is recommended every 6 months, including first and last visit; additional follow-up is determined by LIA	Target Population: Infants who reached 6 to 12 months of age within the reporting period whose mothers enrolled prenatally. Data Collection Time Point: Home visit at or after the child reached 6 months. Suggested Data Elements: Date of enrollment, child date of birth, breastfed any amount at 6 months, date assessed.
(Numerator)			Demographics Form documents breastfeeding intention (if prenatal) and current breastfeeding status (if postpartum).				

FAMILY SPIRIT

Performance Measures	Numerator Denominator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) enrolled in home visiting for at least 6 months (Denominator)						
3. Depression Screening	For those not enrolled prenatally, number of primary caregivers enrolled in home visiting who are screened for depression within the first 3 months since enrollment; for those enrolled prenatally, the number of primary caregivers screened for depression within 3 months of delivery (Numerator)	Recommended	Screener: Center for Epidemiologic Studies Depression Scale (CES-D) or Edinburgh Postnatal Depression Scale (EPDS)	Family Spirit does not require screening results to be reported	All primary caregivers	Within 1 month postpartum and then every 6 months (or more frequently if needed)	Target Population: Primary caregivers with at least 3 months enrollment. Data Collection Time Point: At least 3 months after enrollment for those enrolled postnatally and at least 3 months post-delivery for those enrolled prenatally. Suggested Data Elements: Date of enrollment, child date of birth, caregiver depression screening, date of screening, enrolled prenatally.
	For those not enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least 3 months; for those enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least three months post delivery (Denominator)						
4. Well-child visit	Number of children (index child) enrolled in home visiting who received the last recommended well child visit based on the AAP schedule (Numerator)	Recommended	Medical Chart Review Form documents well-child visits	Family Spirit does not require outcomes to be reported	All index children	Medical Chart Review Form is recommended after participant exits	Target Population: Enrolled index children. Data Collection Time Point: Data will be collected at multiple points in time throughout enrollment to correspond to the AAP recommendation schedule.
	Number of children (index child) enrolled in home visiting (Denominator)						Suggested Data Elements: Date of home visit, completion of last expected well-child visit.

FAMILY SPIRIT

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
5. Postpartum care <i>(Numerator)</i>	Number of mothers enrolled in home visiting prenatally or within 30 days after delivery who received a postpartum visit with a healthcare provider within 8 weeks (56 days) of delivery	Recommended	Medical Chart Review Form documents mother’s clinic visits	Family Spirit does not require outcomes to be reported	All index children	Medical Chart Review Form is recommended after participant exits	Target Population: Mothers enrolled prenatally or within 30 days of giving birth and remain enrolled for at least 8 weeks postpartum. Data Collection Time Point: At least 56 days post-delivery. Suggested Data Elements: Mother enrolled prenatally, date of enrollment, postpartum health visit, postpartum health visit date, length of enrollment, child date of birth.
<i>(Denominator)</i>	Number of mothers who enrolled in home visiting prenatally or within 30 days after delivery and remained enrolled for at least 8 weeks (56 days) after delivery						
6. Tobacco cessation referrals <i>(Numerator)</i>	Number of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were referred to tobacco cessation counseling or services within 3 months of enrollment	Recommended	Session Summary Form documents all referrals made at the visit Health Educator Referral Form documents individual referrals	Family Spirit does not require outcomes to be reported	All primary caregivers	Session Summary Form at each visit; Health Education Referral Form as needed	Target Population: Primary caregivers enrolled for 3 months who used tobacco or cigarettes at enrollment. Data Collection Time Point: Intake and 3 months post-enrollment. Suggested Data Elements: Date of enrollment, tobacco use at enrollment, tobacco cessation referral, date of tobacco cessation referral.
<i>(Denominator)</i>	Number of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were enrolled for at least 3 months						
BENCHMARK 2: Child Injuries, Abuse, Neglect, and Maltreatment, and Emergency Department Visits							
7. Safe sleep <i>(Numerator)</i>	Number of infants (index child aged less than 1 year) enrolled in home visiting whose primary caregiver reports that they are always placed to sleep on their backs, without bed-sharing or soft bedding	Recommended	Home Safety Check documents child’s sleeping location	Family Spirit does not require outcomes to be reported	All primary caregivers	Home Safety Check is recommended every 6 months, including first and last visit	Target Population: Index children less than 1 year of age during the reporting period. Data Collection Time Point: Within 1 year of date of birth. Suggested Data Elements: Child date of birth, safe sleep practices.

FAMILY SPIRIT

Performance Measures	Numerator Denominator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
(Denominator)	Number of infants (index child) enrolled in home visiting who were aged less than 1 year during the reporting period						
8. Child injury (Numerator)	Number of parent-reported nonfatal injury-related visits to the ED since enrollment among children (index child) enrolled in home visiting	Recommended	Medical Chart Review Form documents ER visits	Family Spirit does not require outcomes to be reported	All index children	Medical Chart Review Form is recommended after participant exits	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Emergency department visit, emergency department visit date.
(Denominator)	Number of children (index child) enrolled in home visiting						
9. Child maltreatment (Numerator)	Number of children (index child) enrolled in home visiting with at least 1 investigated case of maltreatment since enrollment	Recommended	Medical Chart Review Form documents maltreatment noted in medical record	Family Spirit does not require outcomes to be reported	All index children	Medical Chart Review Form is recommended after participant exits	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Investigated child maltreatment, date of investigated child maltreatment.
(Denominator)	Number of children (index child) enrolled in home visiting						
BENCHMARK 3: School Readiness and Achievement							
10. Caregiver-child interaction (Numerator)	Number of primary caregivers enrolled in home visiting who receive an observation of caregiver-child interaction by the home visitor using a validated tool	Recommended	Screener: Parenting Interactions with Children: Checklist of Observations Linked to Outcomes (PICCOLO)	Family Spirit does not require outcomes to be reported	All primary caregivers	PICCOLO is recommended every 6 months, beginning at 12 months postpartum	Target Population: Primary caregivers with index child in target age range (target age range determined by grantee and consistent with administration protocol specified by validated tool selected).
(Denominator)	Number of primary caregivers enrolled in home visiting with children reaching the target age range						Data Collection Time Point: Based on the child's age during the reporting period. Suggested Data Elements: Parent-child interaction observation, parent-child interaction observation date.

FAMILY SPIRIT

Performance Measures	Numerator Denominator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
11. Early language and literacy	Number of children (index child) enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories, and/or sang songs with their child daily, every day	Recommended	Screener: Ages and Stages Questionnaire (ASQ) documents literacy activities	Family Spirit does not require outcomes to be reported	Child of primary caregiver	Every 2 months, beginning 2 months postpartum	Target Population: Primary caregivers with index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Caregiver or family member support of early language and literacy activities, date of caregiver or family member support of early language and literacy activities.
(Numerator)							
	Number of children (index child) enrolled in home visiting						
(Denominator)							
12. Developmental screening	Number of children (index child) enrolled in home visiting with at least one screening within the AAP-defined age groups during the reporting period	Recommended	Screener: ASQ	Family Spirit does not require screening results to be reported	All children of primary caregivers	Every 2 months, beginning 2 months postpartum	Target Population: Primary caregivers with index children ages 9 months to 30 months. Data Collection Time Point: Throughout reporting period for children ages 9 months to 30 months. Suggested Data Elements: Date of developmental screening, index child age (eligibility for assessment).
(Numerator)							
	Number of children (index child) enrolled in home visiting reaching the specified time frame during the reporting period						
(Denominator)							
13. Behavioral concerns	Number of home visits where primary caregivers enrolled in home visiting were asked if they have any concerns regarding their child’s development, behavior, or learning	Recommended	Screener: Ages and Stages Questionnaire: Social Emotional (ASQ: SE); Brief Infant Toddler Social Emotional Assessment (BITSEA)	Family Spirit does not require outcomes to be reported	All primary caregivers	ASQ-SE: 2 and 6 months postpartum, and then every 6 months thereafter BITSEA: Every 6 months, beginning 12 months postpartum	Target Population: Postnatal primary caregivers with index children. Data Collection Time Point: Each home visit throughout the reporting period. Suggested Data Elements: Developmental concerns
(Numerator)							
	Total number of home visits during the reporting period						
(Denominator)							inquiry, home visit date, primary caregiver’s pre- or postnatal status.
BENCHMARK 4: Crime or Domestic Violence

BENCHMARK 1: Maternal and Newborn Health							
1. Preterm birth	Number of live births (index child or subsequent children among mothers who enrolled in home visiting prenatally before 37 weeks) born before 37 completed weeks of gestation and after enrollment	Required	Referral to home visiting program documents gestational age at birth	Efforts to Outcome (ETO): Child DOB, gestational age in weeks	All primary caregivers	At enrollment	Target Population: Pregnant women enrolled prior to 37 completed weeks of gestation and who delivered in the reporting period. Data Collection Time Point: End of pregnancy. Suggested Data Elements: Date of enrollment, gestational age at enrollment (or estimated delivery date to calculate gestational age at enrollment), child date of birth, live birth status (yes/no).
(Numerator)							
(Denominator)	Number of live births after enrollment who were born to mothers enrolled in home visiting prenatally before 37 weeks						
2. Breastfeeding	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	Required	Family Map Inventory: Are you currently breastfeeding?	Completed Family Map Inventory is scanned into ETO	All primary caregivers	At enrollment and every 6 months through 36 months	Target Population: Infants who reached 6 to 12 months of age within the reporting period whose mothers enrolled prenatally. Data Collection Time Point: Home visit at or after the child reached 6 months. Suggested Data Elements: Date of enrollment, child date of birth, breastfed any amount at 6 months, date assessed.
(Numerator)							
(Denominator)	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) enrolled in home visiting for at least 6 months

3. Depression Screening	For those not enrolled prenatally, number of primary caregivers enrolled in home visiting who are screened for depression within the first 3 months since enrollment; for those enrolled prenatally, the number of primary caregivers screened for depression within 3 months of delivery	Required	Family Map Inventory: Do you have a mental or physical health problem or illness that requires regular, ongoing care? Have any family members ever been diagnoses with depression? Have you ever been diagnosed with depression? In the past 2 weeks, how often have you experienced any of the following depression symptoms?	ETO: Bothered by feeling down, depressed, or hopeless? Completed Family Map Inventory is scanned into ETO	All primary caregivers	At enrollment and every 6 months thereafter	Target Population: Primary caregivers with at least 3 months enrollment. Data Collection Time Point: At least 3 months after enrollment for those enrolled postnatally and at least 3 months post-delivery for those enrolled prenatally. Suggested Data Elements: Date of enrollment, child date of birth, caregiver depression screening, date of screening, enrolled prenatally.
(Numerator)							
	For those not enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least 3 months; for those enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least three months post delivery						
(Denominator)							
4. Well-child visit	Number of children (index child) enrolled in home visiting who received the last recommended well child visit based on the AAP schedule	Required	Family Map Inventory: Has your child received recommended check-ups from a doctor within the last 12 months?	Completed Family Map Inventory is scanned into ETO	All index children	At enrollment and every 6 months thereafter	Target Population: Enrolled index children. Data Collection Time Point: Data will be collected at multiple points in time throughout enrollment to correspond to the AAP recommendation schedule. Suggested Data Elements: Date of home visit, completion of last expected well-child visit.
(Numerator)

17. Completed depression referrals	Number of primary caregivers enrolled in home visiting who received recommended services for depression (and met the conditions specified in the denominator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers who screened positive for depressive symptoms and were referred for services. Data Collection Time Point: After referral for positive depression screening. Suggested Data Elements: Prenatal status, child date of birth, date of enrollment, positive depression screening results, referral for depression services, depression services received date.
(Numerator)							
(Denominator)	Number of primary caregivers enrolled in home visiting who had a positive screen for depression within 3 months of enrollment (for those not enrolled prenatally) or within 3 months of delivery (for those enrolled prenatally) and were referred for services						
18. Completed developmental referrals	Number of children enrolled in home visiting who a) received individualized developmental support from a home visitor; b) were referred to early intervention services and received an evaluation within 45 days; OR c) were referred to other community services who received services within 30 days (and met the conditions specified in the denominator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Index children who screen positive for developmental delays. Data Collection Time Point: After positive developmental screening. Suggested Data Elements: Positive developmental screening, developmental delay services received, developmental delay service date.
(Numerator)							
(Denominator)	Number of children enrolled in home visiting with positive screens for developmental delays (measured using a validated tool)

BENCHMARK 1: Maternal and Newborn Health							
1. Preterm birth	Number of live births (index child or subsequent children among mothers who enrolled in home visiting prenatally before 37 weeks) born before 37 completed weeks of gestation and after enrollment	Required	HFA Program Records/ HFAST Site Profile Report	HFA Program Records/HFAST Site Profile Report: Total number of children born prior to 37 weeks	All index children	End of pregnancy	Target Population: Pregnant women enrolled prior to 37 completed weeks of gestation and who delivered in the reporting period. Data Collection Time Point: End of pregnancy. Suggested Data Elements: Date of enrollment, gestational age at enrollment (or estimated delivery date to calculate gestational age at enrollment), child date of birth, live birth status (yes/no).
(Numerator)							
	Number of live births after enrollment who were born to mothers enrolled in home visiting prenatally before 37 weeks						
(Denominator)							
2. Breastfeeding	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Infants who reached 6 to 12 months of age within the reporting period whose mothers enrolled prenatally. Data Collection Time Point: Home visit at or after the child reached 6 months. Suggested Data Elements: Date of enrollment, child date of birth, breastfed any amount at 6 months, date assessed.
(Numerator)							
	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) enrolled in home visiting for at least 6 months						
(Denominator)

3. Depression Screening	For those not enrolled prenatally, number of primary caregivers enrolled in home visiting who are screened for depression within the first 3 months since enrollment; for those enrolled prenatally, the number of primary caregivers screened for depression within 3 months of delivery	Required (at accreditation only)	HFA does not require a specific screener, many use EPDS or PHQ-9 / reported at accreditation on HFA spreadsheets or site custom report	Date of completion – reported on HFA spreadsheets or site custom report	All primary caregivers	If enrolled prenatally, once prenatally and once within 3 months of birth; at enrollment when enrolled postnatally	Target Population: Primary caregivers with at least 3 months enrollment. Data Collection Time Point: At least 3 months after enrollment for those enrolled postnatally and at least 3 months post-delivery for those enrolled prenatally. Suggested Data Elements: Date of enrollment, child date of birth, caregiver depression screening, date of screening, enrolled prenatally.
(Numerator)							
	For those not enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least 3 months; for those enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least three months post delivery						
(Denominator)							
4. Well-child visit	Number of children (index child) enrolled in home visiting who received the last recommended well child visit based on the AAP schedule	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Enrolled index children. Data Collection Time Point: Data will be collected at multiple points in time throughout enrollment to correspond to the AAP recommendation schedule. Suggested Data Elements: Date of home visit, completion of last expected well-child visit.
(Numerator)							
	Number of children (index child) enrolled in home visiting						
(Denominator)

7. Safe sleep	Number of infants (index child aged less than 1 year) enrolled in home visiting whose primary caregiver reports that they are always placed to sleep on their backs, without bed-sharing or soft bedding	Recommended (reviewed for accreditation, but not collected)	HFA Program Record /casefiles reviewed at accreditation	HFA Program Record: Determined by LIA	All index children	Determined by LIA	Target Population: Index children less than 1 year of age during the reporting period. Data Collection Time Point: Within 1 year of date of birth. Suggested Data Elements: Child date of birth, safe sleep practices.
(Numerator)							
	Number of infants (index child) enrolled in home visiting who were aged less than 1 year during the reporting period						
(Denominator)							
8. Child injury	Number of parent-reported nonfatal injury-related visits to the ED since enrollment among children (index child) enrolled in home visiting	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Emergency department visit, emergency department visit date.
(Numerator)							
	Number of children (index child) enrolled in home visiting						
(Denominator)							
9. Child maltreatment	Number of children (index child) enrolled in home visiting with at least 1 investigated case of maltreatment since enrollment	Required	State-required CPS reporting forms / HFAST Site Profile Report / casefiles reviewed at accreditation	HFAST Site Profile Report: Number of primary participants involved in CPS as caregiver during reporting period	All primary participants	End of reporting period	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Investigated child maltreatment, date of investigated child maltreatment.
(Numerator)							
	Number of children (index child) enrolled in home visiting						
(Denominator)							
BENCHMARK 3: School Readiness and Achievement							

HEALTHY FAMILIES AMERICA

10. Caregiver-child interaction	Number of primary caregivers enrolled in home visiting who receive an observation of caregiver-child interaction by the home visitor using a validated tool	Required	CHEERS Check-In or other validated tool / accreditation site self-study	Total Number of primary caregivers with observation of caregiver-child interaction	All families with child 4 to 36 months	Starting Jan 2018 - based on child's age during reporting period	Target Population: Primary caregivers with index child in target age range (target age range determined by grantee and consistent with administration protocol specified by validated tool selected). Data Collection Time Point: Based on the child's age during the reporting period. Suggested Data Elements: Parent-child interaction observation, parent-child interaction observation date.
(Numerator)							
	Number of primary caregivers enrolled in home visiting with children reaching the target age range						
(Denominator)							
11. Early language and literacy	Number of children (index child) enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories, and/or sang songs with their child daily, every day	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Caregiver or family member support of early language and literacy activities, date of caregiver or family member support of early language and literacy activities.
(Numerator)							
	Number of children (index child) enrolled in home visiting						
(Denominator)							
12. Developmental screening	Number of children (index child) enrolled in home visiting with at least one screening within the AAP-defined age groups during the reporting period	Required	Screener: ASQ-3/ reported at accreditation on HFA spreadsheets or site custom report	Dates of completion, child DOB	All enrolled children unless developmentally inappropriate and/or enrolled in early intervention	Twice each year from birth to age 3, then annually thereafter	Target Population: Primary caregivers with index children ages 9 months to 30 months. Data Collection Time Point: Throughout reporting period for children ages 9 months to 30 months. Suggested Data Elements: Date of developmental screening, index child age (eligibility for assessment).
(Numerator)							

HEALTHY FAMILIES AMERICA

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details

15. Primary caregiver education	Number of primary caregivers who enrolled in, maintained continuous enrollment in, or completed a high school degree or equivalent after enrollment in home visiting (and met the conditions specified in the denominator)	Required	HFA screening tool/ HFAST Site Profile Report	HFA screening tool / HFAST Site Profile Report: Less than high school education (yes/no), last grade completed, number of primary participants who have and who have not completed H.S. diploma or GED at enrollment	All primary caregivers	At enrollment	Target Population: Primary caregivers without a high school degree or equivalent at enrollment. Data Collection Time Point: Enrollment and end of each reporting period. Suggested Data Elements: High school degree or equivalent status at enrollment, enrollment or completion of high school degree or equivalent, enrollment of completion of high school degree or equivalent screening date.
(Numerator)							
	Number of primary caregivers without a high school degree or equivalent at enrollment						
(Denominator)							
16. Continuity of insurance coverage	Number of primary caregivers enrolled in home visiting who reported having health insurance coverage for at least 6 consecutive months since enrollment in home visiting	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers who have been enrolled in home visiting for 6 months. Data Collection Time Point: Measured on or after 6 months post-enrollment. Suggested Data Elements: Date of enrollment, continuous health insurance status for 6 months.
(Numerator)							
	Number of primary caregivers enrolled in home visiting for at least 6 months						
(Denominator)							
BENCHMARK 6: Coordination and Referral for Community Resources and Supports							
17. Completed depression referrals	Number of primary caregivers enrolled in home visiting who received recommended services for depression (and met the conditions specified in the denominator)	Recommended (reviewed for accreditation, but not required)	Screeners: HFA does not require a specific screener, many use EPDS or PHQ-9Data source: Determined by LIA / casefiles reviewed at accreditation	N/A	All primary caregivers	After referral for positive screen	Target Population: Primary caregivers who screened positive for depressive symptoms and were referred for services. Data Collection Time Point: After referral for positive depression screening.
(Numerator)

Data Collection Time Point: After positive developmental screening. Suggested Data Elements: Positive developmental screening, developmental delay services received, developmental delay service date.
(Denominator)	Number of children enrolled in home visiting with positive screens for developmental delays (measured using a validated tool)						
19. Intimate partner violence referrals (Numerator)	Number of primary caregivers enrolled in home visiting who received referral information to IPV resources (and met the conditions specified in the denominator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers who screened positive for intimate partner violence (IPV). Data Collection Time Point: After positive IPV screening.

HOME INSTRUCTION FOR PARENTS OF PRESCHOOL YOUNGSTERS

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
(Denominator)	Number of primary caregivers enrolled in home visiting with positive screens for IPV (measured using a validated tool) within 6 months of enrollment						Suggested Data Elements: Positive IPV screening results, IPV screening date, IPV referral, IPV referral date, date of enrollment.

MATERNAL INFANT HEALTH OUTREACH WORKER PROGRAM

Performance Measures	Numerator Denominator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
BENCHMARK 1: Maternal and Newborn Health							
1. Preterm birth	Number of live births (index child or subsequent children among mothers who enrolled in home visiting prenatally before 37 weeks) born before 37 completed weeks of gestation and after enrollment	Recommended	MIHOW Form: Month One Interview Guide	Expected due date, child DOB	All women enrolled prenatally	1 month postpartum	Target Population: Pregnant women enrolled prior to 37 completed weeks of gestation and who delivered in the reporting period. Data Collection Time Point: End of pregnancy. Suggested Data Elements: Date of enrollment, gestational age at enrollment (or estimated delivery date to calculate gestational age at enrollment), child date of birth, live birth status (yes/no).
(Numerator)							
	Number of live births after enrollment who were born to mothers enrolled in home visiting prenatally before 37 weeks						
(Denominator)							
2. Breastfeeding	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	Recommended	MIHOW Form: Six Month Interview Guide	Breastfeeding (yes/no), duration of breastfeeding, reasons for stopping breastfeeding	All women enrolled prenatally	6 months postpartum	Target Population: Infants who reached 6 to 12 months of age within the reporting period whose mothers enrolled prenatally. Data Collection Time Point: Home visit at or after the child reached 6 months. Suggested Data Elements: Date of enrollment, child date of birth, breastfed any amount at 6 months, date assessed.
(Numerator)							
	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) enrolled in home visiting for at least 6 months						
(Denominator)							
3. Depression Screening	For those not enrolled prenatally, number of primary caregivers enrolled in home visiting who are screened for depression within the first 3 months since enrollment; for those enrolled prenatally, the number of primary caregivers screened for depression within 3 months of delivery	Recommended	Screener: Edinburgh Postnatal Depression Scale (EPDS) MIHOW Form: Month One Interview Guide	Date of completion, Child DOB, EPDS screening, emotional health questions	All women enrolled prenatally	1 month postpartum	Target Population: Primary caregivers with at least 3 months enrollment. Data Collection Time Point: At least 3 months after enrollment for those enrolled postnatally and at least 3 months post-delivery for those enrolled prenatally. Suggested Data Elements: Date of enrollment, child date of birth, caregiver depression screening, date
(Numerator)

	For those not enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least 3 months; for those enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least three months post delivery (Denominator)						of screening, enrolled prenatally.
4. Well-child visit	Number of children (index child) enrolled in home visiting who received the last recommended well child visit based on the AAP schedule (Numerator)	Recommended	MIHOW Form: Six Month Interview Guide	Number of times baby has been to a doctor or nurse for a well-baby checkup	All index children	6 months postpartum	Target Population: Enrolled index children. Data Collection Time Point: Data will be collected at multiple points in time throughout enrollment to correspond to the AAP recommendation schedule. Suggested Data Elements: Date of home visit, completion of last expected well-child visit.
	Number of children (index child) enrolled in home visiting (Denominator)						
5. Postpartum care	Number of mothers enrolled in home visiting prenatally or within 30 days after delivery who received a postpartum visit with a healthcare provider within 8 weeks (56 days) of delivery (Numerator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Mothers enrolled prenatally or within 30 days of giving birth and remain enrolled for at least 8 weeks postpartum. Data Collection Time Point: At least 56 days post-delivery. Suggested Data Elements: Mother enrolled prenatally, date of enrollment, postpartum health visit, postpartum health visit date, length of enrollment, child date of birth.
	Number of mothers who enrolled in home visiting prenatally or within 30 days after delivery and remained enrolled for at least 8 weeks (56 days) after delivery (Denominator)						
6. Tobacco cessation referrals	Number of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were referred to tobacco cessation counseling or services within 3 months of enrollment (Numerator)	Recommended	MIHOW Form: Enrollment and Month One Interview Guides	Tobacco use now (yes/no), average number of cigarettes smoked per day, referrals made to assist participant	All women enrolled prenatally	At enrollment and at 1 month postpartum	Target Population: Primary caregivers enrolled for 3 months who used tobacco or cigarettes at enrollment. Data Collection Time Point: Intake and 3 months post-enrollment. Suggested Data Elements: Date of enrollment, tobacco use at enrollment, tobacco cessation referral, date of tobacco cessation referral.

BENCHMARK 2: Child Injuries, Abuse, Neglect, and Maltreatment, and Emergency Department Visits							
7. Safe sleep	Number of infants (index child aged less than 1 year) enrolled in home visiting whose primary caregiver reports that they are always placed to sleep on their backs, without bed-sharing or soft bedding	Recommended	MIHOW Form: Months One and Six Interview Guides	Sleep position for baby, frequency of bed-sharing	All index children	1 and 6 months postpartum	Target Population: Index children less than 1 year of age during the reporting period. Data Collection Time Point: Within 1 year of date of birth. Suggested Data Elements: Child date of birth, safe sleep practices.
(Numerator)							
(Denominator)	Number of infants (index child) enrolled in home visiting who were aged less than 1 year during the reporting period						
8. Child injury	Number of parent-reported nonfatal injury-related visits to the ED since enrollment among children (index child) enrolled in home visiting	Recommended	MIHOW Form: Months Six, Twelve, Twenty-Four, and Thirty-Six Interview Guides	Number of child visits to hospital emergency room, number of emergency room visits as a result of accident, injury, or poisoning	All index children	6, 12, 24, and 36 months postpartum	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Emergency department visit, emergency department visit date.
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting						
9. Child maltreatment	Number of children (index child) enrolled in home visiting with at least 1 investigated case of maltreatment since enrollment	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Investigated child maltreatment, date of investigated child maltreatment.
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting						
BENCHMARK 3: School Readiness and Achievement

Performance Measures	Numerator Denominator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
10. Caregiver-child interaction	Number of primary caregivers enrolled in home visiting who receive an observation of caregiver-child interaction by the home visitor using a validated tool	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with index child in target age range (target age range determined by grantee and consistent with administration protocol specified by validated tool selected).
(Numerator)							
	Number of primary caregivers enrolled in home visiting with children reaching the target age range						Data Collection Time Point: Based on the child’s age during the reporting period. Suggested Data Elements: Parent-child interaction observation, parent-child interaction observation date.
(Denominator)							
11. Early language and literacy	Number of children (index child) enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories, and/or sang songs with their child daily, every day	Recommended	MIHOW Form: Months One, Six, Twelve, Twenty-Four, and Thirty- Interview Guides	Frequency mother or other family members told stories or sang songs to baby in last week, frequency mother or other family member read to baby in last week	All index children	1, 6, 12, 24, 36 months postpartum	Target Population: Primary caregivers with index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Caregiver or family member support of early language and literacy activities, date of caregiver or family member support of early language and literacy activities.
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting						
12. Developmental screening	Number of children (index child) enrolled in home visiting with at least one screening within the AAP-defined age groups during the reporting period	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with index children ages 9 months to 30 months. Data Collection Time Point: Throughout reporting period for children ages 9 months to 30 months. Suggested Data Elements: Date of developmental screening, index child age (eligibility for assessment).
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting reaching the specified time frame during the reporting period

Performance Measures		Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
		Denominator						
BENCHMARK 1: Maternal and Newborn Health								
1.	Preterm birth	Number of live births (index child or subsequent children among mothers who enrolled in home visiting prenatally before 37 weeks) born before 37 completed weeks of gestation and after enrollment	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Pregnant women enrolled prior to 37 completed weeks of gestation and who delivered in the reporting period. Data Collection Time Point: End of pregnancy. Suggested Data Elements: Date of enrollment, gestational age at enrollment (or estimated delivery date to calculate gestational age at enrollment), child date of birth, live birth status (yes/no).
(Numerator)								
(Denominator)		Number of live births after enrollment who were born to mothers enrolled in home visiting prenatally before 37 weeks						
2.	Breastfeeding	Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Infants who reached 6 to 12 months of age within the reporting period whose mothers enrolled prenatally. Data Collection Time Point: Home visit at or after the child reached 6 months. Suggested Data Elements: Date of enrollment, child date of birth, breastfed any amount at 6 months, date assessed.
(Numerator)								
(Denominator)		Number of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) enrolled in home visiting for at least 6 months						
3.	Depression Screening	For those not enrolled prenatally, number of primary caregivers enrolled in home visiting who are screened for depression within the first 3 months since enrollment; for those enrolled prenatally, the number of primary caregivers screened for depression within 3 months of delivery	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with at least 3 months enrollment. Data Collection Time Point: At least 3 months after enrollment for those enrolled postnatally and at least 3 months post-delivery for those enrolled prenatally. Suggested Data Elements: Date of enrollment, child date of birth, caregiver depression screening, date of screening, enrolled prenatally.
(Numerator)

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
(Denominator)	Number of primary caregivers enrolled in home visiting with children reaching the target age range						
11. Early language and literacy	Number of children (index child) enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories, and/or sang songs with their child daily, every day	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with index children. Data Collection Time Point: End of reporting period. Suggested Data Elements: Caregiver or family member support of early language and literacy activities, date of caregiver or family member support of early language and literacy activities.
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting						
12. Developmental screening	Number of children (index child) enrolled in home visiting with at least one screening within the AAP-defined age groups during the reporting period	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers with index children ages 9 months to 30 months. Data Collection Time Point: Throughout reporting period for children ages 9 months to 30 months. Suggested Data Elements: Date of developmental screening, index child age (eligibility for assessment).
(Numerator)							
(Denominator)	Number of children (index child) enrolled in home visiting reaching the specified time frame during the reporting period						
13. Behavioral concerns	Number of home visits where primary caregivers enrolled in home visiting were asked if they have any concerns regarding their child’s development, behavior, or learning	Required	SafeCare Daily Activities Checklist	Data are required to be documented by LIAs, but are not required to be reported to the national office	All index children ages 0 to 5 years	Within the first 4 months of enrollment during the implementation of the Parent-Child Interaction Module in the SafeCare curriculum	Target Population: Postnatal primary caregivers with index children. Data Collection Time Point: Each home visit throughout the reporting period. Suggested Data Elements: Developmental concerns inquiry, home visit date, primary caregiver’s pre- or postnatal status.
(Numerator)							
(Denominator)	Total number of home visits during the reporting period						
BENCHMARK 4: Crime or Domestic Violence

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
14. Intimate partner violence screening <i>(Numerator)</i>	Number of primary caregivers enrolled in home visiting who are screened for IPV using a validated tool within 6 months of enrollment	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers enrolled for at least 6 months. Data Collection Time Point: 6 months post-enrollment.
<i>(Denominator)</i>	Number of primary caregivers enrolled in home visiting for at least 6 months						Suggested Data Elements: IPV screening, IPV screening date, date of enrollment.
BENCHMARK 5: Family Economic Self-Sufficiency							
15. Primary caregiver education <i>(Numerator)</i>	Number of primary caregivers who enrolled in, maintained continuous enrollment in, or completed a high school degree or equivalent after enrollment in home visiting (and met the conditions specified in the denominator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers without a high school degree or equivalent at enrollment. Data Collection Time Point: Enrollment and end of each reporting period. Suggested Data Elements: High school degree or equivalent status at enrollment, enrollment or completion of high school degree or equivalent, enrollment of completion of high school degree or equivalent screening date.
<i>(Denominator)</i>	Number of primary caregivers without a high school degree or equivalent at enrollment						
16. Continuity of insurance coverage <i>(Numerator)</i>	Number of primary caregivers enrolled in home visiting who reported having health insurance coverage for at least 6 consecutive months since enrollment in home visiting	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers who have been enrolled in home visiting for 6 months. Data Collection Time Point: Measured on or after 6 months post-enrollment. Suggested Data Elements: Date of enrollment, continuous health insurance status for 6 months.
<i>(Denominator)</i>	Number of primary caregivers enrolled in home visiting for at least 6 months						
BENCHMARK 6: Coordination and Referral for Community Resources and Supports							
17. Completed depression referrals <i>(Numerator)</i>	Number of primary caregivers enrolled in home visiting who received recommended services for depression (and met the conditions specified in the denominator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers who screened positive for depressive symptoms and were referred for services. Data Collection Time Point: After referral for positive depression screening.

SAFECARE

Performance Measures	Numerator	Required or Recommended Reporting by the Model	Data Source/Data Collection Form/ Location in Database	Data Elements Collected by Model	Target Population for Model	Data Collection Time Point for Model	Federal Reporting Details
	Denominator						
	Number of primary caregivers enrolled in home visiting who had a positive screen for depression within 3 months of enrollment (for those not enrolled prenatally) or within 3 months of delivery (for those enrolled prenatally) and were referred for services						Suggested Data Elements: Prenatal status, child date of birth, date of enrollment, positive depression screening results, referral for depression services, depression services received date.
(Denominator)							
18. Completed developmental referrals	Number of children enrolled in home visiting who a) received individualized developmental support from a home visitor; b) were referred to early intervention services and received an evaluation within 45 days; OR c) were referred to other community services who received services within 30 days (and met the conditions specified in the denominator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Index children who screen positive for developmental delays. Data Collection Time Point: After positive developmental screening. Suggested Data Elements: Positive developmental screening, developmental delay services received, developmental delay service date.
(Numerator)							
(Denominator)	Number of children enrolled in home visiting with positive screens for developmental delays (measured using a validated tool)						
19. Intimate partner violence referrals	Number of primary caregivers enrolled in home visiting who received referral information to IPV resources (and met the conditions specified in the denominator)	Not required data collection by model	N/A	N/A	N/A	N/A	Target Population: Primary caregivers who screened positive for intimate partner violence (IPV). Data Collection Time Point: After positive IPV screening. Suggested Data Elements: Positive IPV screening results, IPV screening date, IPV referral, IPV referral date, date of enrollment.
(Numerator)							
(Denominator)	Number of primary caregivers enrolled in home visiting with positive screens for IPV (measured using a validated tool) within 6 months of enrollment
